

Addendum 2013-1

This addendum is a clarification to some points with the written Rulebook Edition 2012. All further definitions are explained in the according Judgebooks and are valid on the day of publishing on the official EMMA Homepage www.emmanet.com

Agreed April 2013

Paragraph	Change
Generals	In SQ Experienced and Advanced the surface of the dashboard has to follow the OEM design. Speaker adapter rings can be used and grills may be changed, but must not protrude from the OEM surface. Only OEM locations are allowed for installing speakers.
Music source	<p>Streaming of media is allowed for the judging process if requested by the competitor. The media and the streaming device will be provided by EMMA. The competitor is responsible that the systems source unit will connect to the provided unit (Smartphone, Tablet etc)</p> <p>If a local copy of media is necessary for the judging process, the competitor has to make it possible that the EMMA SQ judge can copy the files to the competitors unit. After finishing the judging procedure the files will be deleted.</p> <p>It is up to the competitor to ensure that one of the provided formats can be reproduced in their car media system.</p>
2.5.8	During all events it is always possible to send out 2 judges per category/class, even if it is stated otherwise in the rulebook. This decision must be announced before the start of the event.
3.4 3.5 3.8	The definition of how to judge the Imaging/staging section is described in detail in the according Judgebook. The description in the rulebook is just a hint of what to look for and doesn't count for the judging procedure.
3.1.2	Experienced class: Co-Axial speakers will be considered as two speakers
3.1.3	Advanced class: can the rule for no modification of the dashboard be checked by the installation judges during the judging process. If not, this sentence should be changed!! NOTE: the same sentence is used in Experienced!! Addendum: "reinforcing/dampening the dashboard" will be deleted from the rulebook.
4.3.4	The description in the according Judgebook is the valid version. This means the passenger side footroom shall not be smaller than the distance between closest pedal and driver seat. This is measured with the both front seats aligned.
4.4.3	Overall design will be deleted completely
5.1.1	MM Experienced: it is not allowed to use either an center channel or an surround channel in this class.
5.1.1	There will be no european final for MM Experienced.
MM	In MM Expert a max of 30 Bonus points will be given
Racing	The Tracks to be used for judging are Track 8 and 10-12
4.2	For a cable length less than 40 cm between battery connection and distribution point/and or another battery the following fuses are allowed to use: "normal fuse size according to rulebook table x 2" This rule applies for ALL categories! Maximum wire length between battery connection and amplification is 2.5 meters. This has to be proven by the competitor.
